Professional Summary

Python/Django Backend Developer with **5 years of experience** designing and building **scalable, secure, and high-performance backend systems** in **FinTech, Banking, and DeFi** domains. Strong expertise in **Django REST Framework, PostgreSQL, Celery, Redis, Docker, and ledger-based financial architectures**. Proven experience in **wallet systems, transaction processing, interest calculations, background jobs, and API security**. Hands-on with **CI/CD, performance optimization, and database tuning**. Currently expanding skills in **Machine Learning** to integrate data-driven intelligence into backend platforms.

Technical Skills

Backend & Frameworks: Python, Django, Django REST Framework, Flask, Fast API, Celery, Redis, WebSocket.

Databases: PostgreSQL, MySQL, Microsoft SQL Server, MongoDB

API, Security & Payments: REST APIs, JWT, RBAC, Razor pay Integration, Webhooks, Secure Financial Workflows

DevOps & Cloud: Docker, Jenkins, Kubernetes (basic), AWS (EC2, S3), CI/CD Pipelines

Data & Analytics: Pandas, NumPy, Scikit-learn (basic models)

Machine Learning (Learning / Hands-on): Scikit-learn (basic models), data preprocessing, model training & evaluation

Web Technologies: HTML, CSS, Bootstrap, JavaScript

Tools & OS: Git, GitHub, VS Code, PyCharm, Conda | Linux, Windows

CORE COMPETENCIES

- Backend API Development & Integration
 - FinTech / DeFi Systems Design
 - Wallet & Ledger-Based Architecture
 - Background Jobs & Task Scheduling (Celery, Celery Beat)
 - PostgreSQL Query Optimization & Indexing
 - Performance Tuning & Debugging
 - Secure Transaction Processing
 - Requirement Analysis & System Design
-

Professional Experience

Filter Trade Technology Ltd. — Python/Django Developer

May 2025 - Present

- Developing and maintaining **scalable backend APIs** using Django and DRF for financial platforms.
- Designing **secure data processing workflows** for transactional systems.
- Optimizing PostgreSQL queries to improve **API response time and system performance**.
- Collaborating with product and QA teams to deliver **production-ready features**.

Thinkzy Tech — Python/Django Developer

Apr 2022 - Jun 2023

- Designed and developed **RESTful APIs** using Django REST Framework.
- Implemented **asynchronous background tasks** using Celery and Redis.
- Designed relational database schemas and optimized **PostgreSQL queries and indexes**.
- Participated in **code reviews, debugging, and production issue resolution**.

Vibgyor Informatics Technologies Ltd. — Software Engineer

Jun 2019 - Apr 2022

- Developed backend modules using **Python, Django, and PostgreSQL**.
 - Enhanced existing production systems for **stability and performance**.
 - Worked closely with cross-functional teams for **requirement analysis and implementation**.
-

Major Projects

DeFi Investment Management System

Role: Python/Django Backend Developer

Technologies: Python, Django, Django REST Framework, PostgreSQL, Celery, Redis, Docker, Crypto Live APIs

Overview:

Developed a backend system for a DeFi platform enabling users to invest funds, manage wallets, earn daily interest, and receive referral rewards with secure and automated financial processing.

Key Contributions: -

- Designed a **wallet-based financial architecture** supporting deposits, withdrawals, interest accrual, and referrals.
 - Implemented **daily automated interest calculation** using Celery and Celery Beat.
 - Built a **transaction ledger system** with complete audit logging for financial traceability.
 - Enforced **principal lock-in rules** and withdrawal validation logic.
 - Integrated **live cryptocurrency price APIs** for real-time portfolio valuation.
 - Developed **admin approval workflows** for sensitive financial actions
-

CDL Lakshmi Finance — Banking & Loan Management System

Role: Software Engineer

Technologies: Python, Django, Django REST Framework, PostgreSQL, Docker, Flask.

Overview:

Enterprise banking platform for managing consumer loans, customer onboarding, approvals, repayments, and reporting with minimal manual intervention.

Key Contributions: -

- Developed **secure REST APIs** for loan lifecycle management.
 - Implemented backend logic for **loan approvals, repayments, and status tracking**.
 - Optimized PostgreSQL queries for **scalability and performance**.
 - Supported **Docker-based deployments** and production enhance
-

EDUCATION

B.E. in Information Technology

MIT Academy of Engineering, SPP University

Diploma in Computer Engineering

Government Polytechnic, Murtizapur (MSBTE)

CERTIFICATIONS & TRAINING

- DevOps Training (Docker, Jenkins, Kubernetes) – 2024
 - Barclays – Global Youth Employability Initiative
-
