naikmonika73@gmail.com

Maharashtra, India

Professional Summary

Python/Django Backend Developer with **4+ years of experience** building scalable backend systems across **FinTech, Banking, and DeFi domains**. Strong expertise in **Django REST Framework, PostgreSQL, Celery, Redis**, and secure financial workflows including wallet systems, transaction ledgers, and automated interest calculations. Experienced in **Dockerized deployments, CI/CD practices**, and performance optimization. Currently upskilling in **Machine Learning** to integrate data-driven intelligence into backend systems.

Technical Skills

Backend & Frameworks

Python, Django, Django REST Framework, Flask, FastAPI, Celery, Redis

Databases

PostgreSQL, MySQL, Microsoft SQL Server, MongoDB

DevOps & Cloud

Docker, Jenkins, Kubernetes, AWS (EC2, S3)

Data & Analytics

Pandas, NumPy

Machine Learning (Learning / Hands-on)

Scikit-learn (basic models), data preprocessing, model training & evaluation

Web Technologies

HTML, CSS, Bootstrap, JavaScript

Tools

Git, GitHub, Visual Studio Code, PyCharm

Operating Systems

Linux, Windows

Core Competencies

- Backend API Development & Integration
 - Financial & Transactional Systems
 - Wallet & Ledger-Based Architecture
 - Requirement Analysis & Implementation
 - Performance Optimization & Debugging
 - Background Jobs & Task Scheduling (Celery)
-

Professional Experience

Filter Trade Technology Ltd. — Python/Django Developer

Feb 2025 – Present - Developing and maintaining backend APIs for financial systems using Django and DRF. - Working on secure data processing, performance optimization, and database design.

Thinkzy Tech — Python/Django Developer

Apr 2022 – Jun 2023 - Designed and developed RESTful APIs using Django REST Framework. - Implemented background tasks using Celery and Redis. - Worked with PostgreSQL for data modeling and query optimization. - Participated in code reviews, bug fixing, and production support.

Vibgyor Informatics Technologies Ltd. — Software Engineer

Jun 2019 – Apr 2022 - Developed backend modules using Django and PostgreSQL. - Maintained and enhanced production applications. - Collaborated with cross-functional teams for requirement analysis and implementation.

Major Projects

DeFi Investment Management System

Role: Python/Django Backend Developer

Technologies: Python, Django, Django REST Framework, PostgreSQL, Celery, Redis, Docker, Crypto Live APIs

Overview:

Developed a backend system for a DeFi platform enabling users to invest funds, manage wallets, earn daily interest, and receive referral rewards with secure and automated financial processing.

Key Contributions: - Designed a wallet-based financial architecture supporting deposits, withdrawals, interest, and referrals. - Implemented **daily automated interest calculation** using Celery and Celery Beat. - Built a **transaction ledger system** with complete audit logging. - Enforced principal lock-in rules and withdrawal validation logic. - Integrated live cryptocurrency price APIs for real-time valuation. - Developed admin approval workflows for financial actions.

CDL Lakshmi Finance — Banking & Loan Management System

Role: Software Engineer

Technologies: Python, Django, Django REST Framework, PostgreSQL, Docker

Overview:

Enterprise banking platform for managing consumer loans, customer onboarding, approvals, repayments, and reporting with minimal manual intervention.

Key Contributions: - Developed secure REST APIs for loan processing and customer management. - Implemented backend logic for loan lifecycle, approvals, and repayments. - Optimized PostgreSQL queries for performance and scalability. - Supported Docker-based deployments and production enhancements.

Education

B.E. in Information Technology

MIT Academy of Engineering, SPP University

Diploma in Computer Engineering

Government Polytechnic, Murtizapur (MSBTE)

Certifications & Training

- DevOps Training (Docker, Jenkins, Kubernetes) – 2024
 - Barclays – Global Youth Employability Initiative
-
